---

This manufacturing is largely concentrated in the South, with 8.6 GW of capacity in Texas and 8.4 GW in Georgia. In 2024, cell manufacturing was reshored for the first time in ...

Cumulative installed solar capacity, measured in gigawatts (GW).

Indian manufacturers built 25.3 GW of solar module manufacturing capacity in 2024, taking the nation's panel capacity to 90.9 ...

In 2024, generators added a record 30 GW of utility-scale solar to the US grid, accounting for 61% of capacity additions last year. EIA expects this trend will continue in 2025, with 32.5 GW of ...

-- The U.S. solar industry added 8.6 gigawatts (GW) of new solar module manufacturing capacity in Q1 2025, marking the third-largest quarter for new manufacturing ...

New York has achieved a significant milestone in its journey towards sustainable energy with the surpassing of 6 GW of distributed ...

In 2024, generators added a record 30 GW of utility-scale solar to the US grid, accounting for 61% of capacity additions last year. EIA expects this ...

New York has achieved a significant milestone in its journey towards sustainable energy with the surpassing of 6 GW of distributed solar capacity. This accomplishment comes ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

In addition to growing module capacity, U.S. solar cell production capacity doubled in Q1 to 2 GW with the opening of a new factory in South Carolina. The report finds that the ...

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes ...

New York has over 6 GW of distributed solar capacity. Learn how they achieved this milestone and join the solar movement.

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes solar photovoltaic and concentrated solar power.

Small-scale solar arrays in New York have surpassed 6 GW of capacity, meeting a milestone 2025 goal more than a year early.

New York State has achieved a significant milestone in its renewable energy journey by installing over 6 gigawatts (GW) of distributed solar capacity, surpassing its initial ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, ...

Utility-scale solar capacity reached 128.6 GW in March 2025, growing from 96.9 GW in March 2024, while small-scale solar, projects of 1 MW or less, reached 55.7 GW in ...

Utility-scale solar capacity reached 128.6 GW in March 2025, growing from 96.9 GW in March 2024, while small-scale solar, projects of ...
