How many battery swap cabinets are there?

With rich industry experience, we have deployed more than 5,000 battery swap cabinets and put into use 65,000+ smart lithium batteries, providing convenient services for drivers in more than 35 countries around the world, helping clients build a profitable and scalable battery swap business.

What is a tycorun battery swap cabinet?

The swap cabinet uses intelligent charging strategies to optimize battery performance, with easy maintenance, real-time fault alarms. TYCORUN batteries are built for business swap applications, using top-tier cells that withstand high-frequency daily cycling, with shock resistance, high safety, and integrated smart 4G GPS.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

What should a battery cabinet have?

Handles - provides an easy way to handle the battery cabinet. Battery holding brackets - they ensure the battery is always in a fixed position (no movement). Cooling plates - some have cooling plates that help to control the enclosure temperature. Insulation system- insulation is also a safety measure a battery cabinet should have.
