-----  
Can lithium batteries be transported by air?

Use cargo aircraft for standalone lithium batteries and never ship damaged or recalled batteries to avoid penalties and safety hazards. You will encounter two main types when transporting lithium batteries by air: lithium ion batteries and lithium metal batteries.

What happens if you don't ship lithium batteries in air cargo?

For example, one enforcement action imposed \$66,000 in civil penalties for improper transporting lithium batteries. Failure to comply may result in shipment rejection or legal action. These regulations help you safely ship lithium batteries and reduce fire risks in air cargo.

Does IATA offer a shipping lithium batteries by air course?

For proper training on dangerous goods including the Shipping Lithium Batteries by Air course, IATA offers a wide variety of safety courses to ensure you are competent in dealing with dangerous goods. This is required for all who participate in the shipping and handling of dangerous goods.

Are lithium batteries safe to ship?

Always use UN 38.3 certified lithium batteries and follow IATA packaging and labeling rules to ensure safe and legal air shipment. Ship lithium batteries at no more than 30% charge and protect terminals to reduce fire risks and meet airline requirements.
