A Rear Door Heat Exchanger (RDHx) is a cooling solution employed in data centers to regulate the heat produced by IT equipment, like servers and networking devices, housed within server ...

This blog outlines best practices for data center area planning per rack, segmented by power density levels (5-12 kW, 12-20 kW, and >20 kW), and based on the industry-standard space ...

We offer the most comprehensive selection of Coolant Distribution Units and provide a complete flexibility for data center operators.

GRC (Green Revolution Cooling) has launched a new immersion cooling design for extreme-density computing that can support ...

We specialize in custom-tailored CDUs, providing bespoke solutions for data centers ranging from 1 megawatt to 6 megawatts. Our plug-and-play Load Banks are designed ...

Explore Dell's Integrated Rack Scalable Systems, designed for high-performance computing, scalability, and efficiency. Discover customizable ...

Customize your data center experience with Gaw's specialized server racks and cabinets, engineered to ensure the perfect fit for your specific requirements.

The amount of power used by each data center rack continues to rise for enterprise users, according to new research from ...

Designed specifically for OCP ORV3 version racks, this 200kW liquid-liquid CDU delivers high-efficiency cooling for the most demanding workloads. The DeepCoolAI ORV3 In ...

Optimize your AI data center racks with Flex's ORv3-compliant or fully custom designs built for AI and high-density workloads with global reach and local customization.

SmartRack®; Modular Data Centers are composed of IT rack, cooling and service enclosures that together form a performance optimized data center, or POD. This innovative design enables ...

All our custom data center network racks, server racks, and products are manufactured right here in the USA at our facility in Des Plaines, IL. In addition to producing standard configurations, ...

Our custom made data center racks are designed to fit your exact specifications, ensuring a perfect fit and maximizing space utilization. Whether you need unique dimensions, specialized ...

Rising Rack Densities: A Driver for High-Density Rack Power Distribution Units The average power density of data center racks continues to rise to support AI and ML, crossing 10kW in ...

Master the art of data center server rack management with our ultimate 2024 guide. Rack selection, organization, and optimization with ...

A liquid-to-liquid Coolant Distribution Unit (CDU) in a data center is a specialized system crafted to oversee the distribution of liquid coolant ...

Explore data center energy consumption statistics and key trends. Learn efficiency benchmarks and insights shaping sustainable infrastructure decisions.

Understanding Why High-Density Rack Lighting Needs a Rethink In data centers running 100kW+ racks, lighting isn't just about visibility--it's about survival.
