Which server rack should you choose?

From small computer rooms to large data centres, IS-1 server racks are the first choice. Thanks to the flexible expandability - whether in cold or hot aisle containment systems - you can rely on maximum investment security. Regardless of whether it is a small or large data centre, the server hardware must be housed securely.

Where can I get the most out of my server room storage?

Get the most out of your server room storage with our server racks and accessories. Our range offers a stable and durable platform for your valuable network and AV equipment. We can help you: Germany - StarTech.com Server Racks offer durable construction that ensures a stable platform for valuable network and server equipment.

What is a IS-1 server rack?

The IS-1 server rack is specially designed for use in data centres with high heat loads and conditioned air(cooled,no dust in the air). It has perforated doors on both sides for horizontal ventilation. It offers perforated or closed doors depending on the type of cooling architecture selected.

Why do I need a 19-inch rack?

They are required for very special hardware that is very rarely used,as the 19-inch standard has become established worldwide. The 19-inch rack and the 19-inch server cabinet are standardised in accordance with IEC 60297 and DIN 41494. Much more important,however,are the height units (HUs) of 44.45 mm each.

19" Server Cabinets 36U server rack, Unique, 1785x600x1000 mm steel front door w. plexi glass, black (RAL 9005)
