---

Greece is set to receive a major boost in its energy storage capacity with the approval of a landmark 330 MW/790 MWh battery project in Thessaly. This project, led by ...

The European Commission has approved a EUR1 billion (US\$1.1 billion) state aid measure for Greece to support two solar-plus-storage projects.

The rapid growth of Greece's storage market is driven by a combination of factors, including Greece's heavy reliance on fossil gas which has led to high price volatility, ambitious energy ...

The Greek measures Greece notified the Commission of its plans to provide support to two projects for the generation and storage of renewable energy for a total budget of EUR1 billion.

Another round is planned for April 2025, with the goal of allocating an additional 300 MW. These tenders are part of the country's 1 ...

The European Commission approves EUR1 billion in state aid for Greece's Faethon and Seli solar projects, set to add 813 MW of renewable energy with innovative storage.

Stelios Psomas, policy advisor at HELAPCO looks at the current state of the solar PV market in Greece and what role energy storage plays.

Public Power Corporation (PPC) has launched construction on two BESS projects in Northern Greece totalling 98MW/196MWh of capacity.

Greece plans to provide EUR 1 billion in state subsidies to support two solar power projects, with a total capacity of over 800 MW and with integrated energy storage units.

The transactions in Greece, which are for 132MWp of solar PV and 400MW of battery energy storage system (BESS) projects, mark the ...

Market participants increasingly expect a slowdown in the rollout of new renewable energy projects in Greece, with related delays also seen in battery storage investments.

The Seli Project entails the construction of a 309 MW photovoltaic unit with an integrated lithium-ion battery energy storage system. This project aims to optimise electricity generation and grid ...

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted ...

Although there are opportunities for U.S. renewable energy firms, they face steep competition from Chinese and European competitors, particularly in certain sub-sectors like ...

The European Commission has recently approved EUR1 billion under EU State aid rules to support two projects for the renewable energy generation and storage in Greece. The ...

Greece plans to provide EUR 1 billion in state subsidies to support two solar power projects, with a total capacity of over 800 MW ...

Greece offers strong renewable energy investment opportunities in solar, wind, and storage with EU support.

Greece offers lucrative renewable energy investment opportunities in 2025 with expanding solar and wind projects supported by EU funding.
