The U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) is looking to advance the development of non-lithium long-duration energy storage ...

Is grid-scale battery storage needed for renewable energy integration? Battery storage is one of several technology options that can enhance power system flexibility and enable high levels of ...

The US government's Department of Energy (DOE) is set to pump \$100 million into projects looking at non-lithium batteries for long-term energy storage.

The funding opportunity announced today is part of the Long-Duration Energy Storage Pilot Program, which aims to advance the maturity of a variety of non-lithium LDES ...

The Office of Clean Energy Demonstrations (OCED) at DOE recently announced the selection of nine long-duration energy storage projects, which include at seven locations in the western ...

Discover the world's biggest battery storage projects of 2025, including BYD's 12.5 GWh system in Saudi Arabia, Grenergy's 11 GWh Atacama ...

These projects are part of the broader joint venture between N2OFF and Solterra Renewable Energy Ltd., which focuses on solar and energy storage initiatives.

SRP issued RFPs in 2022 and 2024 for LDES technology demonstration projects and will explore with Google the inclusion of multiple projects in the research collaboration.

CMBlu Energy is a leading designer and manufacturer of safe, sustainable, and secure long-duration battery energy storage systems. CMBlu's patented Organic SolidFlow(TM) ...

US Department of Energy will offer up to US\$100 million for pilot-scale non-lithium long-duration energy storage technology ...

The US federal Department of Energy (DOE) will offer up to US\$100 million for pilot-scale long-duration energy storage (LDES) projects utilising non-lithium technologies.

The global pipeline for Long-Duration Energy Storage (LDES) has surged, driven by breakthroughs in non-battery technologies like Liquid Air and Compressed Air systems.

The Office of Electricity announced \$5 million each to 3 grid-scale energy storage projects that support critical facilities and ...

This funding--made possible by the President Biden's Bipartisan Infrastructure Law--will focus on non-lithium technologies, long-duration (10+ hour discharge) systems, and ...

Non battery energy storage systems offer innovative and sustainable alternatives to traditional battery-based storage. Learn about their benefits, applications, and key technologies.

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

November 1, 2024 This document was prepared with and funded by the U.S.

The US Department of Energy (DoE) has announced \$100 million in funding for non-lithium battery projects. This initiative aims to support pilot-scale energy storage demonstration ...
